

THE POWER TO UNIFY. EVERYONE.

INTEGRATED MESSAGE MANAGEMENT HAS NEVER BEEN SO EASY. OR SO AFFORDABLE.

Who in your organization would benefit from integrated voicemail and email? How about everyone?

Sales people can receive office voicemail from their smartphones and are no longer anchored to their desk phones. Customer Service reps can keep a single archive of voicemail and email. With Donoma Unify, your entire team is connected — wherever they are.

It's easy. Unify integrates your email and voicemail intuitively — so there's no need for training. Unify works with your existing equipment, eliminating IT headaches.

And it's affordable. With Unify, you'll start seeing the benefits right away — in your productivity and on your bottom line.

Best of all, it's easy to see how Unify can work for you. Visit our website and take Donoma Unify for a test drive today.

DONOMA  **UNIFY**

INTEGRATED MESSAGING. SIMPLIFIED.

VOICEMAIL + Email - TOGETHER AT LAST.

No matter where you are, if you've got email, you've got your office voicemail. Unify creates a simple audio file that it sends to your email.

EASY TO USE.

There's no training required. And chances are, you may already have the phone and email systems you need to use Unify.

MESSAGING YOU CAN MOVE, SHARE AND STORE.

Unify synchronizes and stores all your voicemail messages. Finding and sharing an important voicemail is easy and intuitive.

LET'S START THE COMMUNICATION.

Your fast-paced workplace demands that your team stays connected — to their co-workers, managers, suppliers and customers. It's easy when they're at their desks. But your business doesn't work that way.

That's why Donoma Unify gives everyone instant access to their voicemail messages —wherever their work takes them. It's designed to be intuitive and easy to use. When a voicemail arrives, it's converted to an email message that employees can quickly access from a variety of mobile devices or via their email inbox. And because the message status — unread, read or deleted — is synchronized between the phone and email system, messages are handled just one time. It's that simple.

Once in email format, the messages are a new source of valuable business information that's easily saved, stored, organized and shared. Archived voice messages can be useful for verifying instructions, confirming orders and documenting verbal correspondence.

Technical information & requirements

Integrated Messaging support currently offered for Novell GroupWise 6.5 and higher.

Messages accessible via the Web, PDA, PC, or PC soft phone application.

Currently Donoma Unify is a Cisco Compatible product supporting Cisco's Unity Voicemail software (v3.2 or higher). The Unified Messaging component of Cisco Unity is not required in order to run Donoma Unify.

Most organizations purchase voicemail software to match their underlying telephone system. However, Cisco Unity does support competing telephone platforms. For a listing of Cisco's third party platforms and Unity configuration guides, please visit: http://www.cisco.com/en/US/products/sw/voicesw/ps2237/products_installation_and_configuration_guides_list.html.

Donoma Unify does not require any additional server resources beyond the standard requirements for the Cisco Unity Server.
