

UNIFY 8.5.1 FOR GROUPWISE

Unified Messaging for Cisco® Unity Connection®

Stay on top of your game with just one touch.

The convenience of voicemail with the flexibility of email.

9 out of 10 phone calls go to voicemail. Yet busy professionals can't afford to let messages wait—nor do they have time to keep calling the office to check for new messages.

Unify for GroupWise seamlessly delivers your voicemail messages to you right away via your phone, PC, smartphone or web-browser.

Touch that message once and Unify takes care of the rest. Automatically, immediately, conveniently.

No more message clutter and confusion. Just great responsiveness that keeps you in touch no matter where you are.

Key Features for busy professionals:

- Voicemail messages delivered to your GroupWise inbox.
- Dynamic updates of message status to all your voicemail access systems.
- Supports voicemail message archiving compliance. (Required in regulated industries)
- Team Message Relay Feature—great for sharing messages & status amongst a team
- Intuitive to use. No training required.
- Easy to save & file voicemail messages.
- Share voicemail with anyone via email. Even include additional documents.
- Review messages on your device of choice: PC, smartphone, web browser, or IP Communicator client.
- Support for iPhone, Blackberry and Android
