

StoneScribe 3.2.5

Jabber Instant Message Archiving for
Cisco® IM & Presence

SEAMLESS MESSAGE MANAGEMENT, COMPLIANCE & ARCHIVING

Instant messaging is now part of the organizational communication toolset. Now your Jabber instant messages can be retained, secured and managed to keep pace with your retention policies, litigation hold requirements and compliance requirements.

Meet StoneScribe.

StoneScribe makes it easy to ensure that records are retained according to policy with appropriate access controls and audit trails. Its intuitive interface makes it easy for designated personnel to quickly access and produce the records they need.

StoneScribe is used by organizations around the world to support a variety of needs, from litigation support to compliance with communications retention regulations. Best of all, our unique architecture proves the unparalleled data integrity and retention policy compliance.

StoneScribe 3.2.5

Jabber Instant Message Archiving for
Cisco® IM & Presence

Our approach:
Instant Messaging Stays Instant

- No server interference or delay
- Data retained in real time

Others' approach:
Messaging Relay & Delay

- No Jabber messaging if server goes offline
- Multiple possible points of failure

Compliance & Records Management:

- Policy-driven communications retention & management.
- Multi-level Access Control roles .
- Easy to filter, preview & produce conversations.
- Option to retain conversation attachments.
- Complete audit trail activity reporting.
- U.S. Dept. of Defense Level File Shredding.
- Retains & consolidates Jabber chats from **every** device.
- Smart Keyword Actions provide auto notification, tracking and tagging.
- Great for organizational insight, analytics & training.
- Streamlined design does not impede or throttle message flow.

SUPPORTED PLATFORMS

Cisco Unified Communication Manager
Cisco IM& Presence Server (Formerly CUPS)
