

Unify for Notes 8.7

Unified Messaging for Cisco® Unity Connection®

AUTO-SYNCRONIZED UNIFIED MESSAGING FOR TRUE PRODUCTIVITY

Today 9 out of 10 phone calls go to voicemail. Yet busy professionals cannot afford to let messages wait. Nor is it convenient to keep calling in to check messages.

There is a better solution.

Unify for Notes provides dynamic unified messaging for your Cisco voice messages to integrate automatically with Lotus Notes. The moment a message arrives, it's immediately accessible, with notification and playback within email.

Even better, Unify updates messages automatically with every action. Delete the message in one place and it cleans up everywhere, even updating the message waiting light on your office phone.

No more message clutter or confusion. Just great responsiveness that keeps you in touch no matter where your workday takes you.
